Disclaimer

This listing is based on paper and digital records held by the National Monuments Service, the National Archives and the Oireachtas Library. Research to clarify the number and extent of some of the monuments that are protected by a Preservation Order is ongoing. Consequently, the information presented here should be considered as a work in progress and changes will be implemented from time to time. While every effort has been made in preparing this data, any omissions or errors on the list should not be taken to mean a Preservation Order is not in force. If you require clarification on a record included in the listing or have a query relating to Preservation Orders please e-mail nationalmonuments@housing.gov.ie

Information about the list of Preservation Orders

The following list of Preservation Orders details all monuments/wrecks that have a Preservation Order (PO) placed on them. Currently there are **549** such records.

Format of the list

The list is presented alphabetically by county and is made up of a number of columns detailing the PO number, the PO date, the PO description, the PO location and the relevant SMR number/Wreck number.

PO Number: Each Preservation Order is given a number, this number relates to the year the Order was placed in for example 01/1931 means it was the first order placed in 1931.

PO Date: This refers to the exact date the Preservation Order came into effect.

PO Description: This identifies the type of monument(s) covered by the Preservation Order. It is described as it is on the official order therefore the terminology used does not follow the classification system used by the Archaeological Survey of Ireland.

Townland: The townland names used are in accordance with those used by the Ordnance Survey. If a monument extends over more than one townland, all townlands are listed.

County: The County in which the monument is situated.

SMR/Wreck Number: The Sites and Monuments Record (SMR) number provides the link to the records of the Archaeological Survey of Ireland. This SMR number can be used to access further information on the monument(s) on the Historic Environment Viewer available here: [Historic Environment Viewer](#)

Five PO records relate to Wrecks. In such cases the relevant Wreck number(s) is provided and further information on these can be found on the Wreck Viewer available here: [Wreck Viewer](#)
